## JS第一周第四天

javascript

## localStorge (本地存储)

```
<label for="userName">账号:</label>
<input id="userName" type="text" placeholder="请输入用户名" autofocu</pre>
<label for="password">密码:</label>
<input id="password" type="text" placeholder="请输入密码">
<br>
<input type="checkbox" id="remember">记住密码
</body>
//localStorage.setItem() 设置存储的内容
  remember.onclick=function () {
   if(this.checked){
```

```
localStorage.setItem(userName.value,password.value)
   password.onfocus=function () {
     let val=userName.value;
     let res=localStorage.getItem(val);
     if(res==null){
     }else {
       password.value=res;
   };
 console.log(localStorage.getItem("WW"));//本地中没有存储这个名字,就是n
</script>
```
